

# Cryptozoology A To Z: The Encyclopedia of Loch Monsters, Sasquatch, Chupacabras, and Other Authentic Mysteries of Nature

The ultimate quest for the worlds most mysterious creatures. The Loch Ness Monster, Bigfoot, the Abominable Snowman -- these are the names of the elusive beasts that have caught the eye and captured the imaginations of people around the world for centuries. Recently, tales of these monsters have been corroborated by an increase in sightings, and out of these legends a new science has been born: cryptozoology -- the study of hidden animals. Cryptozoology A to Z, the first encyclopedia of its kind, contains nearly two hundred entries, including cryptids (the name given to these unusual beasts), new animal finds, and the explorers and scientists who search for them. Loren Coleman, one of the worlds leading cryptozoologists, teams up with Jerome Clark, editor and author of several encyclopedias, to provide these definitive descriptions and many never-before-published drawings and photographs from eyewitnesses detailed accounts. Full of insights into the methods of these scientists, exciting tales of discovery, and the history and evolution of this field, Cryptozoology A to Z is the most complete reference ever of the newest zoological science.
